

Barloworld Sustainable Development CEO Message

Barloworld is committed to sustainable development and the ongoing creation of value for all our stakeholders.

This commitment is reflected in the group's daily activities and articulated in our Value Based Management Philosophy, our Code of Ethics and related policies.

Our strategic framework and our 10 Pillars of Sustainability guide our decisions and provide a filter and standards against which we continually review and assess our operations.

Barloworld operates in over 40 countries and we strive to be a responsible global corporate citizen.

In this regard we are signatories to the United Nations Global Compact and our corporate reporting is in terms of the Global Reporting Initiative (G3).

In addition, we are members of the Johannesburg Stock Exchanges' Socially Responsible Investment Index (JSE SRI).

We have also completed the Carbon Disclosure Project (CDP 2010) which is publically available.

We are committed to making a positive contribution to the global challenge of Climate Change. Our focus is both on offering environmentally sensitive integrated solutions to our customers as well as reducing the negative consequences of our activities on Climate Change.

We measure and report our activities in this regard, as well as continually assess associated risks and opportunities.

My intention is that Barloworld is recognised as a leading responsible corporate that creates ongoing value for all our stakeholders and that we fulfill our role in leaving an environment we can be proud of and one which our future generations will respect.
